

# HOLLAND GETS HER GAME.

THEORETICALLY SINKS THE GREAT KEARSARGE OFF NEWPORT HARBOR.

Torpedo boats won a big victory over the Kearsarge yesterday. Three of the little craft caught the Kearsarge at once. The Holland work-the attackers won the first day.

Newport, R. I., Sept. 25.—The close blockade which it was expected that the ships of the Red Fleet would make off the port tonight was a one-sided affair. Try as they would the torpedo boats were only able to find the Kearsarge and Indiana, and the Texas is still undiscovered. It was shortly before a o'clock when the marine boat Holland was seen at the mouth of the harbor, and started out of the channel. She was half submerged and her commander, Lieut. Caldwell, expected great things of her. It was the first time that she has ever been put to a test.

The newspaper boat passed her at Castle Hill and after a short chase she was seen to be in the darkness behind. This was the first of her until she returned to her dock at the station.

At dusk the torpedo boats Porter, Rogers, Gwynn, Morris and Dahlgren left the harbor and went out to sea to get a good position for the work that was to be done, and at a late hour to-night when Commander Morris, in charge of the torpedo station was seen, he was very much pleased with their work, and said that he was satisfied that they would be upheld by the Board of Arbitration.

It was six o'clock before a ship was seen on the lights of the harbor. A gun was seen from the Kearsarge, and a torpedo boat picked up a ship and had torpedoed her. From that time on at short intervals guns were heard in the distance, and the red and green stars could be seen. At one time three stars were seen up at once and it was afterwards learned that the Rogers, Gwynn and Morris had all torpedoed the Kearsarge at one time. The Gwynn was claimed as a victim by the Kearsarge and she returned to the harbor.

The torpedo boat was the only craft to try to run the blockade, and she had hardly got beyond the lights when she was picked up by the Scorpion and sent back to port. Shortly after this the Gwynn torpedoed the Scorpion and the latter for twenty-seven minutes.

But the first of the night was so close that the gunboat that star hit her stern. The Dahlgren was shot for bigger game and she had to go miles out to sea to find anything in the form of an enemy. She says she torpedoed the Indiana and then returned to port satisfied with putting the Kearsarge out of action.

It was nearly midnight when the Indiana came into her slip at the torpedo station, and it was learned that she had accomplished her object and had it been actual warfare the big ship Kearsarge would be resting in thirty fathoms of water.

The Holland was the only ship that was seen out of water, but the search for the big warship was unable to make this out, and she not only got within torpedoing distance but hailing distance as well. As soon as she had fired her red rocket indicating a torpedo shot, Caldwell opened the coming tower light, hailing the Kearsarge, said: "I claim to have torpedoed you."

"Yes, I guess you have. I have been torpedoed several times to-night," was the answer.

The Holland then looked around for some of the other big ships, but failed to find them. She went miles out to sea, and the time limit for the attack, 11 o'clock, having expired, she returned to port, convulsed by the Porter, and returned to her dock at a good eight o'clock.

The blockade fleet had followed out the instructions of the Kearsarge, and the Kearsarge, as a blockade fleet, ordinarily would not be able to make this out, and she would not be able to make this out, and she would not be able to make this out.

The Texas of all the Red Fleet is the only one that was not found by a torpedo boat, and it is thought she must have been many miles out at sea. Although it is not known where the Holland had a fair shot of her capabilities, those who have followed the boat are satisfied that she did all that she could do. It was learned that in her work to-night everything worked smoothly on board, and not a sound was discernible from the Kearsarge.
